DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-24 are rejected under 35 U.S.C. 102(b) as being substantially met by Garrett, of record.

Patentee discloses making a cured resole syntactic foam containing expandable microspheres (Example 3). In col. 4 line 67 to col. 5 lines 1-17, patentee incorporates by reference in his patent the Morehouse, Jr. et al (3,615,972) patent, of record which relates to the making and the use of the expandable and expanded microspheres used in his patent. In col.12 lines 2 and 3, 14-18 and 42-44 patentees disclose that the shells that make up the surface of the microspheres are made up of the claimed acrylonitrile copolymer. Morehouse. Jr. et al (also of

record) additionally indicates that the microspheres can be coated with a phenol formaldehyde resin (col.14 lines 45-48).

It appears that the Garrett reference anticipates the making of the claimed method and composition.
